<div align="center">**K-HUB DAY 2 REPORT**</div>

Date: 3rd-Aug-2025
Venue: KIET Campus / K-Hub Lab
Attended By: Junior Developers, Senior Developers, Team Leads

---

1. GitHub Repository Setup

Today, each developer created their personal or team GitHub repository to track and showcase their learning journey. Repository structure was discussed and folders like `DayReports`, `Tasks`, `Projects`, `Resources`, and `Internship` were initialized.

Repository Name: `2025Khub`

---

2. Python Basics – 7 Days Plan (Day 1 Completed)

📌 **Topics Covered:**

- [Strings and string methods](#)
- [Booleans and logical operators](#)
- [Lists, Tuples, Sets, Dictionaries](#)
- [Conditional Statements](#)
- [Match Case](#)

Each developer completed the above topics using either self-sourced material or official resources provided by mentors.

Task: Practice coding examples for each topic, share a GitHub commit, and prepare for Day 2 topics.

---

3. Reflections

- Understood core Python data structures
- Got hands-on practice with real code
- Improved confidence in writing conditional logic
